

Primary Consulting Focus (“being the CIOs third hand”)

1. Beyond Strategy, we implement programs for specific goal achievement in IT/Business Processes, IT Operations, Enterprise Projects, Development and PMO environments – based on standard proven frameworks, but not bureaucratic nor burdensome
2. We have an adaptable process model and an available application (PPM Litecycle) for overall Project Lifecycle Governance, which reduces organization churn, bridges process/organization gaps, supports audit needs, and fosters organizational acceptance of the governance process – all leading to faster, smoother project completion
3. We provide senior-level leadership for organizational or program initiatives to complete special projects for CIOs – both technical and process-based, directly managing clients’ personnel if desired, using an adjunct or interim staffing model to act as a “swat team”
4. Roadmaps or other strategic artifacts can be developed in support of IT/Business transformation initiatives
5. We conduct workshops and scoping sessions in the areas such as root cause analysis, problem resolution, risk mitigation, value network modeling, requirements and ITIL component processes

Why CIO Services, LLC

1. Quality equal to the “big consulting firms” at more than 50% less cost
2. Our Project Lifecycle Governance process and application
3. A large pool of CIO-level consultants with 25 years average experience
4. IT/Business process knowledge across a wide domain of market verticals
5. Ability to address programs from initiation to deployment, development to operations, and business solutions to technical solutions – and we have lived change management
6. Partnership relationships across the IT spectrum including security, big data, telephony, visual development, call centers, hosting, cloud computing, and more
